Municipal Solid Waste Annual Report Instructions and Guidance for Online Form

Reporting Requirements

In accordance with Title 30 Texas Administrative Code (30 TAC), Chapter 330, Subchapter P (relating to Fees and Reports), annual reports are required for permitted and registered MSW disposal and processing facilities. Reports are required to be submitted to the TCEQ after the end of each State of Texas fiscal year (FY), which runs from September 1 through August 31. The information the facility provides assists in local, regional, and statewide solid waste management planning efforts. Please be aware that failure to submit the facility annual report on-time with complete and accurate information will be considered a violation of this regulation.

ONLINE ANNUAL REPORT FORM

The annual report can be submitted online through e-Reporting using STEERS (State of Texas Environmental Electronic Reporting System). If you are currently submitting online MSW quarterly reports for your facility, you will be able to use your current STEERS account. If you need to set up a free STEERS account, please visit the following TCEQ webpage:
https://www3.tceq.texas.gov/steers/index.cfm?fuseaction=newacct.welcome&spaaction=createnew

Please allow additional time for creating a STEERS account prior to the submittal of the annual report. Also, if the user creating the report is different than the user authorized to submit the report, both users will need to have a STEERS account.

If you need assistance creating a STEERS account, please contact the STEERS help line at (512) 239-3925 or send an email to steers@tceq.texas.gov.

For instructions on reporting and guidance related to the MSW online annual report, please visit the following TCEQ webpage: https://www3.tceq.texas.gov/steers/help/msw/mswmain.html.

HARD COPY FORMS

If you are unable to submit the annual report online, hard copy forms are available for the different facility types. The hard copy annual report forms and instructions are posted on the TCEQ website at the following address: http://www.tceq.texas.gov/permitting/waste_permits/waste_planning/wp_annual.html.

Submit completed hard copy reports:

- By U.S. Mail (Please include the mail code, MC 124 – the complete mailing address is provided below)
- By e-mail attachment to diane.barnes@tceq.texas.gov or,
- By fax at (512) 239-2007, to the attention of Ms. Diane Barnes.

Contact and Mailing Information

If you need assistance completing the annual report, please contact Ms. Diane Barnes at (512) 239-2626 or Ms. Tamara Young at (512) 239-2218. Mail hard copy forms to one of the following addresses, as appropriate to the carrier:

Regular U.S. Mail:
MC 124
MSW Annual Reports/Diane Barnes
TCEQ
P.O. Box 13087
Austin, TX 78711-3087

Special Delivery:
MC 124
MSW Annual Reports/ Diane Barnes
TCEQ
12100 Park 35 Circle, Bldg A Mail Room
Austin, TX 78753

CREATING ONLINE ANNUAL REPORT

1. Once you have accessed your STEERS account, created your list of permitted/registered facilities, and selected a facility ID number, the "View Official TCEQ Facility Information" screen will be displayed. Confirm facility information and select the "Facility Information Is Correct" tab. If the information is not correct, please contact the agency at registry@tceq.texas.gov or (512) 239-5175.
2. The "Review Selected Annual Reports" screen will be displayed. Since you are creating your Annual Report from scratch, you will not have any records to search for in the "Work Area".
3. Click the "Add New Report" button. The "Create New Annual Report in Work Area" screen will display. Select the reporting year. Click the "Continue" button.

   Note: If you need to view last year's report before
4. The "Identification and Certification" screen will appear. You are now ready to begin submitting data for the Annual Report. There are instructions at the top of most screens to assist you with navigation through the report sections.

Note: You must visit each section and select the "Save" button even if no changes have been made.

UPDATING EXISTING ANNUAL REPORT which has not been submitted to the TCEQ

1. After you have logged into STEERS, selected your permit, and selected the "Annual Reports" tab, the "Review Selected Annual Reports" screen will be displayed. The existing Annual Report will be indicated under the "Pending Annual Reports" section of the screen. Records marked as "error report" in the Report Status column means the report has errors and is accessible for editing. Records marked "Report Valid" means the report does not have any errors and will be displayed as submitted under the "Submitted Annual Reports" section.
2. Click on the year (i.e. 2012) and the "Annual Report Overview" screen will display. Make any applicable changes by selecting the edit button in each section (Note: You must click the Save Changes button on each page whether or not data is entered).
3. Select the "Work Area" tab and then select "Submit" under "Pending Annual Reports". The "Verify These Annual Reports to Send to TCEQ" screen will display. Enter your password and click the Confirm Submit button.

Note: Once the Annual Report has been submitted to the TCEQ, it cannot be edited using Web STEERS. Changes must be submitted to the agency using the hard copy forms.

CORRECTING ERRORS IN ANNUAL REPORT

Submit changes to the agency using the hard copy forms (see HARD COPY FORMS section above).

VIEWING ARCHIVED ANNUAL REPORTS

After you have logged into STEERS, selected your permit, and selected the "Annual Reports" tab, the "Review Selected Annual Reports" screen will be displayed. Work Area previous Reports, select the "TCEQ Archive Records" tab.

Partial data for landfill facilities was migrated into the agency database for 2008, database 2009, and 2010. Submitted FY 2011 data for all MSW facilities was also migrated into the database.

REPORT DATA

Facility Information

Confirm facility information. If data is not correct, please contact the agency at registry@tceq.texas.gov or (512) 239-5175.

Facility Status

This part of the form refers to the facility operational status. Depending upon the facility status from the prior year or whether the facility submitted quarterly reports for the FY determines which options appear on the screen. Status definitions include:

- "Active" The facility accepted waste for disposal or processing during FY.
- "Closed" Authorization to operate was The facility plans to no longer receive accept waste
- "Inactive" The facility did not Facility did not accept any waste for disposal or processing during FY.
- "Inactive" The new facility is authorized Permit/Registration issued, but facility has not opened.
- "Post-Closure" Facility is in post-closure care.

*If the facility has not begun operations to receive waste or if the facility was inactive in previous years, but plans to reopen, indicate the projected operation date.

Contact Information

All information in this section is required to be completed. Enter information for the person the TCEQ can contact regarding the submitted report. Please note that, while the agency has no intent to publish, sell, or otherwise market an email address, it will be stored along with other data that is available to the public on request.

Facility Fees *(Landfill and Processing Facilities)*

Scales for incoming waste
Indicate if this facility uses vehicle scales for weighing some (or all) waste brought into the facility.

Volume for incoming waste
Indicate if this facility uses vehicular volume for weighing some (or all) waste brought into the facility.

Average rates
Indicate average rates charged for accepting waste to this facility for all applicable measuring systems that are used by the facility. These should be the "broad based" averages, indicating the charge to a standard customer or organization for bringing waste to this facility.

Counties served
Select all counties that provided waste material to the facility.

States served
Select all states, other than Texas, that provided waste to the facility.

Note: If waste was received from out-of-state or Mexico, list amounts treated, transferred and/or disposed in the "Solid Waste and Liquid Waste Treatment" sections of the report.

Beneficial Gas Recovery *(Facilities Recovering Landfill Gas for Beneficial Use)*

Landfill Permit Number
Indicate the Permit Number for the landfill from which the facility is recovering gas.

Gas Processed
Indicate the (unrefined) amount or gas recovered and processed during the fiscal year in cubic feet. If you need to convert from cubic yards to cubic feet, multiply the numbe r of cubic yards by 27.

Gas Distributed Off -site
Indicate the amount of gas distributed off-site during the fiscal year in cubic feet. If you need to convert from cubic yards to cubic feet, multiply the number of cubic yards by 27.

Power Generated and Use d
If electric power was generated from collected gas, indicate how many kilowatt-hours (kWh) were generated and used this fiscal year, whether it was for on-site or off-site use.

Power sales
If electric power was generated from collected gas, indicate how many kilowatt-hours (kWh) were generated and sold back to an electric co-op, utilit y, or other power organization.

Monofill *(Landfills for nuisance and abandoned building demolition waste)*

Total Estimated Waste Capacity
Enter estimation, in cubic yards, of the total waste capacity for this facility. Estimation may be determined by multiplying the length, width and depth of a disposal unit. If multiple disposal units exist, enter the total sum of the waste capacity of all the disposal units.

L a s t F Y ô s R e m a i n i n g C a p a c i t y
E n t e r e s t i m a t i o n , i n c u b i c y a r d s , o f t h e w a s t e c a p a c
r e p o r t i n g p e r i o d , a s r e p o r t e d o n l a s t y e a r ô s r e p o r t .
the ñTotal Estimated Waste Capacity.

Amount of Waste Disposed this FY
Enter the amount, in cubic yards, of waste disposed at this facility during the current reporting period.

C u r r e n t F Y ô s R e m a i n i n g C a p a c i t y
Enter the amount, in cubic yards, of the remaining was t e c a p a c i t y f o r t h i s f a c i l i t
reporting period. Subtract the amount of waste disposed this fiscal year from the remaining capacity reported for the previous fiscal year.

Diverted Materials *(Landfill and Processing Faciliti es)*

Diversion tons
Enter the number of tons of each type of material received at the facility and later re-shipped for a non-disposal end use. An example would be recyclables collected on multiple trucks and then consolidated for pick-up. Even if some separation was done (such as separating cans from glass bottles), the material leaves the facility in a similar form to when it arrived and is used for a non-disposal process after leaving the facility. Using yard wastes for composting, cans and bottles forrecycling, and used shingles for asphalt road filler all qualify as non-disposal activities.

Using clean or contaminated soils for daily cover at a landfill does not qualify as diverted or recycled material.

Also, if the landfill has a registered Type V facility located within its permitted boundary; do not include the amounts transferred from the Type V facility. That information should be addressed in the annual report submitted for the Registered Type V facility.

Other Materials Diverted
For amount e n t e r e d i n t o ñ O t h e r Identify those materials that were diverted by the facility for the fiscal year.

Solid Waste Treatment *(Landfill and Processing Facilities)*

For each applicable method of treatment performed at the facility, list the amou nt, in tons, received and treated for each waste and source. If the breakdown between the treatment methods and the origin of the waste is unknown, you may interpolate the unknown values.

Other Solid Waste Treatment Methods
For amount e n t e r e d i n t o ñ O t h e r ò i n t h e t a b l e, i d e n t i f y those treatment methods used by the facility during this FY.

Landfill Disposal *(Landfill Facilities)*

Enter the amount, in tons, for each waste type and by origin disposed at this facility. The total tons of waste disposed should match the total for the quarterly reports submitted to the agency.

Other Disposed Wastes
F o r a m o u n t e n t e r e d i n t o ñ O t h e r ò i n t h e t a b l e, i d e n t i

Liquid Waste Treatment *(Processing Facilities)*

For each applicable waste type received and treated at the facility, list the amount, in tons, and the source. If the breakdown between the treatment methods and the origin of the waste is unknown, you may interpolate the unknown values.

Note: If the facility uses unit measurements other than tons, please adhere to the conversion factors referenced in 30 TAC, Chapter 330, Subchapter P, Section 330.675(a)(2)

Other Liquid Waste Treatment
For amount e n t e r e d i n t h e t a b l e, i d e n t i f y t h e w a s t e types treated by the facility during this FY.

Landfill Characteristics and Management *(Landfill Facilities)*

Total Permitted Area
Indicate the current total permitted acreage for this facility. This would include all fill and non-fill (such as buildings and roads) areas. The fac i l i t y ô s i s s u e d should have this information.

Non-fill Areas
Indicate the current number of acres designated as non-fill areas for this facility. These would include roads, buildings and other areas not designated for disposal cells. T h e f a c i l i t y ô s i s s u e d p e r m this information.

Fill Areas in Post-Closure Care
Indicate the current number of acres for fill areas in post-closure care.

F a c i l i t y ô s P e r m a n e n t B e n c h m a r k E l e v a t i o n :
Indicate the above Mean Sea Level (MSL) elevation at the permanent benchmark f o r t h e f a c i l i t y issued permit document should have this information.

Permitted Max Elevation at Final Cover
Indicate the current permitted elevation (above MSL) at final cover f o r t h e f a c i l i t y . T h e document should have this information.

Permitted Max Elevation at Deepest Excavation
Indicate the current permitted elevation (above /below MSL) at the deepest excavation point for the facility.
T h e f a c i l i t y ô s i s s u e d p e r m i t d o c u m e n t s h o u l d h a v e t h

Alternative Liner
Indicate whether an alternative liner is used.

Alternative Daily Cover
Indicate whether an alternative daily cover is currently being used at the facility, and if so, mark all the types being used.

Gas Collection Control System
Indicate whether the facility has a gas collection control system, and if so, enter the amount of gas flared and/or the amount of gas vented

Leachate Management System
Indicate whether the facility has a leachate management system, and if so, enter the estimated amount of gallons of leachate removedand transported off site.

Groundwater Monitoring System
Indicate whether the facility has a groundwater monitoring system, and if so, enter the total number of point of compliance (POC) wells and the total number of background wells. Background wells include all wells that are not POC or observation wells.

Landfill Gas Monitoring System
Indicate whether the facility has a landfill gas monitoring system, and if so, enter the total number of gas probes/wells. Bar hole probes should not be counted because they are not permanent probes.

Class 1 NHIW Waste
If the facility accepted Class 1 Non-Hazardous Industrial Waste (NHIW) during this FY, enter the total amount, in tons. Also, enter the estimated total amount, in tons, of the remaining capacity for the designated Class 1 NHIW cells in the landfill.

Solid Waste Transfers *(Processing Facilities)*

List the amount, in tons, for each waste typeand sourcethat is accepted and later transferred to another facility for disposal. If the breakdown between thewaste typesand the origin of the waste is unknown, you may interpolate the unknown values.

For treated waste reported section of the report, enter the amount (after treatment) for each waste type transferred from this facility to another facility in the applicable "Treated Waste" field

If applicable, please use conversion factors referenced in30 TAC, Chapter 330, Subchapter P, Section 330.675(a)(2).

Other Solid Waste Transfers
For amount entered into "Other" identify the type and source of waste accepted and later transferred to another facility for disposal during this FY.

Liquid Waste Transfers *(Processing Facilities)*

List the amount, in tons, for each waste typeand sourcethat is accepted and later transferred to another facility for disposal. If the breakdown between the waste types andthe origin of the waste is unknown, you may interpolate the unknown values.

For treated waste reported section of the report, enter the amount (after treatment) for each waste type transferred from this "Waste" field.

If applicable, please use conversionfactors referenced in 30 TAC, Chapter 330, Subchapter P, Section 330.675(a)(2).

Other Liquid Waste Transfers
For the amount entered theitable, identify the types of waste accepted andlater transferred to another facility for disposal during this FY.

Landfill Capacity Assessment *(Landfill facilities)*

We encourage landfill owners/operators to conduct or obtain engineered capacity assessments. The quality of this data is extremely important to our analysis, and we appreciate your efforts to report remaining capacity as accurately as possible. Alternatively, you may create an estimated airspace consumption (based on operational information) if an engineered capacity assessment is not feasible this reporting year.

Assessed Capacity

If an aerial survey was conducted on or between March 1, and August 31, of the fiscal year, the facility may use this report section to certify the remaining capacity of the landfill calculated from that ass essment. Do not use this report section if the facility did not perform an assessment during this period , or if it was done before March 2012. Note that the final capacity number must be as of the end of the fiscal year- August 31.

Remaining Years at Curr ent Performance
Please examine the projected life of the landfill and determine a realistic expectation for the remaining years of capacity of the landfill. Please provide your best estimate of the remaining years of landfill capacity, based on your permi tted vol umes and operational knowledge, and not on short term variations in waste receipts.

Engineer ô Is nformation
Information pertaining to the engineer that performed the assessment is required to be completed in this report section. Assessments without this information will be counted as estimates. The engineer is only responsible for the surveyed capacity. The responsibility for the rest of the report is the responsibility of the person that signs for the report and, ultimately, the entity that own s the permit for this facility.

Landfill Remaining Capacity Estimation *(Landfills)*

Capacity Estimation
If the facility did not perform a surveyed capacity assessment this fiscal year, or the assessment was conducted prior to March , the facility must use this section to calculate the estimated remaining capacity of the landfill. You will need the following information to complete this report section:

- Total tons of waste disposed this fiscal year. The total should include total tons from t h e ñ L a n d f i l Disposa l ò ctio s n e of the report and Class 1 NHIW disposal amount.
- An estimate of your compaction rate for this FY
- An estimate of the volume of daily/intermediate cover placed in the landfill for this fiscal year . If this is not recorded separately, but is accounted for in the total airspace used, please assume "0" fo this question.
- Last year ô final capacity (cubic yards remaining)
- Any changes to the permitted volume of the landfill through a permit amendment approved by the TCEQ during this FY.

Remaining Years at Current Performance

Please examine the projected life of the landfill and determine a realistic expectation for the remaining years of capacity of the landfill. Please provide your best estimate of the remaining years of landfill capacity, based on your permitted vol umes and operational knowledge, and not on short term variations in waste receipts.

Other Activities *(Landfills and Processing Facilities)*

In this section of the report, please indicate all other TCEQ authorized activities that occurred within the facility boundary or are associated with the facility, and provide the authorization (permit, registration, etc.) numbers.

DEFINITIONS

Term	Definition
Brush	Cuttings or trimmings from trees, shrubs, or lawns and similar materials.
CESQG	Conditionally exempt small-quantity generator – a person that generates no more than 220 pounds or hazardous waste in a calendar month.
Central Registry	Consolidated system for the TCEQ to refer to information for a person, organization, facility.
Citizen's Station	A facility established for the convenience and exclusive use of residents (not commercial or industrial users or collection vehicles), except that in small communities where regular collections are not available, small quantities of commercial waste may be deposited by the generator of the waste. The facility may consist of one or more storage containers, bins, or trailers.
Class 1 Waste	Any industrial solid waste or mixture of industrial solid wastes which because of its concentration, or physical or chemical characteristics, is toxic, corrosive, flammable, a strong sensitizer or irritant, a generator of sudden pressure by decomposition, heat, or other means, or may pose a substantial present or potential danger to human health or the environment when improperly processed, stored, transported, or disposed of or otherwise managed, as further defined in 30 TAC §335.505.
Class 2 Waste	Any individual solid waste or combination of industrial solid waste which cannot be described as Hazardous, Class 1 or Class 3 as defined in 30 TAC §335.506.
Class 3 Waste	Inert and essentially insoluble industrial solid waste, usually including, but not limited to, materials such as rock, brick, glass, dirt, and certain plastics and rubber, etc., that are not readily decomposable, as further defined in 30 TAC §335.507.
Commercial Waste	All types of solid waste generated by stores, offices, restaurants, warehouses, and other non-manufacturing activities, excluding residential and industrial wastes.
Compacted Cubic Yard	A combination of a unit of measure (cubic yards) and a description of how the waste was handled before the facility received means other than a household trash compactor.
Construction and Demolition	Waste resulting from construction or demolition projects; includes all materials that are directly or indirectly the by-products of construction work or that result from demolition of buildings and other structures, including, but not limited to, paper, cartons, gypsum board, wood, excelsior, rubber, and plastics.
FY	Fiscal Year- For the State of Texas, the TCEQ, and this report, it refers to the interval of September 1 of the previous year to August 31 of the fiscal year. FY 2012, therefore, is 9/1/2011 to 8/31/2012.
Grease Trap Waste	Material collected in and from a grease interceptor in the sanitary sewer service line of a commercial, institutional, or industrial food service or processing establishment, including the solids resulting from dewatering processes.
Grit Trap Waste	Grit trap waste includes waste from interceptors placed in the drains prior to entering the sewer system at maintenance and repair shops, automobile service stations, car washes, laundries, and other similar establishments.
Litter	Rubbish and putrescible waste.
Low volume Transfer Station	A transfer station used for the storage of collected household waste limited to a total storage capacity of 40 cubic yards located in an unincorporated area that is not within the extraterritorial jurisdiction of a city.

Medical Waste	Waste generated by health-care-related facilities and associated with healthcare activities, not including garbage or rubbish generated from offices, kitchens, or other non-health-care activities. The term includes special waste from health care-related facilities which is comprised of animal waste, bulk blood and blood products, microbiological waste, pathological waste, and sharps as those terms are defined in 25 TAC §1.132 The term does not include medical waste produced on farmland and ranchland as defined in Agriculture Code, §252.001(6), nor does the term include artificial, nonhuman materials removed from a patient and requested by the patient, including but not limited to orthopedic devices and breast implants.
MSW	Municipal Solid Waste
Municipal Solid Waste	Waste resulting from or incidental to municipal, community, commercial, institutional, and recreational activities, including garbage, rubbish, ashes, street cleanings, dead animals, abandoned automobiles, and all other solid waste other than industrial solid waste.
NHIW	NHIW
Owner	The person who owns a facility or part of a facility. Also known as the Permittee.
Post-Closure Care	Maintenance of a landfill area that has had a final cover cap constructed and will not be accepting more waste, is conducting periodic monitoring but has not yet been approved for final closure by the TCEQ executive director.
Processing	Activities including, but not limited to, the extraction of materials, transfer, volume reduction, conversion to energy, or other separation and preparation of solid waste for reuse or disposal, including the treatment or neutralization of hazardous waste, designed to change the physical, chemical, or biological character or composition of any hazardous waste to neutralize such waste, or to recover energy or material from the waste, or to render such waste nonhazardous or less hazardous, safer to transport, store, dispose of, or make it amenable for recovery, amenable for storage, or reduced in volume.
Putrescible Waste	Organic wastes, such as garbage, wastewater treatment plant sludge, and grease trap waste, that can be decomposed by microorganisms with sufficient rapidity as to cause odors or gases or can provide food for or attract birds, animals, and disease vectors.
RACM	Regulated asbestos-containing material as defined in 40 CFR 61, as amended, includes: friable asbestos material, Category I nonfriable ACM that has become friable; Category I nonfriable ACM that will be or has been subjected to sanding, grinding, cutting, or abrading; or Category II nonfriable ACM that has a high probability of becoming or has become crumbled, pulverized, or reduced to powder by the forces expected to act on the material during demolition or renovation operations.
Recyclable Material	A material recovered or diverted from the nonhazardous waste stream for purposes of reuse, recycling, or reclamation, a substantial portion of which is consistently used in the manufacture of products that may otherwise be produced using raw or virgin materials. Recyclable material is not solid waste. However, recyclable material may become solid waste at such time, if any, as it is abandoned or disposed of rather than recycled, whereupon it will be solid waste with respect only to the party actually abandoning or disposing of the material.
Recycling	A process by which materials that have served their intended use or are scrapped, discarded, used, surplus, or obsolete are collected, separated, or processed and returned to use as raw materials in the production of new products. Except for mixed municipal solid waste composting, that is, composting of the typical mixed solid waste stream generated by residential, commercial, and/or institutional sources, recycling includes the composting process if the compost material is put to beneficial use.

Residential (Household) Waste	Any solid waste (including garbage, trash, and sanitary waste in septic tanks) derived from households (including single and multiple hous es, hotels, and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas); does not include yard waste or brush that is completely free of any household wastes.
RN	Regulated entity number - Assigned bythe TCEQ from a Core Data Form (TNRCC-10400); designates the Central Registry number for this facility.
Rubbish	Nonputrescible solid waste (excluding ashes), consisting of both combustible and noncombustible waste materials. Combustible rubbish includes paper, rags, cartons, wood, excelsior, furniture, rubber, plastics, yard trimmings, leaves, or similar materials; noncombustible rubbish includes glass, crockery, tin cans, aluminum cans, metal furniture, and similar materials that will not burn at ordinar y incinerator temperatures (1,600 degrees Fahrenheit to 1,800 degrees Fahrenheit).
Septage	The liquid and solid material pumped from a septic tank, cesspool, or similar sewage treatment system.
Site Operator	The person(s) responsible for operating the facility or part of a facility.
Sludge	Any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water -supply treatment plant, or air pollution control facility, exclusive of the treated efflue nt from a wastewater treatment plant.
Special Waste	Any solid waste or combination of solid wastes that because of its quantity, concentration, physical or chemical characteristics, or biological properties requires special handling and disposal to protect the human health or the environment . If improperly handled, transported, stored, processed, or disposed of or otherwise managed, it may pose a present or potential danger to the human health or the environment - examples include processed sewage sludge, incinerator ash, and medical waste.
Storage	The holding of solid waste for a temporary period, at the end of which the solid waste is processed, disposed of, or stored elsewhere. Facilities established as a neighborhood collection point for only nonputr escible source-separated recyclable material, as a collection point for consolidation of parking lot or street sweepings or wastes collected and received in sealed plastic bags from such activities as periodic citywide cleanup campaigns and cleanup of rights-of-way or roadside parks, or for accumulation of used or scrap tires before transportation to a processing or disposal site are considered examples of storage facilities.
TAC	Texas Administrative Code - 30 TAC is Title 30 of the Texas Administrative Code, and covers all regulations regarding environmental quality.
Transfer Station	A facility used for transferring solid waste from collection vehicles to long -haul vehicles (one transportation unit to another transportation unit). It is not a storage facility such as one where individual residents can dispose of their wastes in bulk storage containers that are serviced by collection vehicles.
Uncompacted CY	A combination of a unit of measure (cubic yards) and a description of how the waste was handled before the facility received it. Uncompacted means not compressed in any manner other than (possibly) a household trash compactor.
